PLANTERS' RECORD

VOL. XLIV

A quarterly paper devoted to the sugar interests of Hawaii, and issued by the Experiment Station for circulation among the plantations of the Hawaiian Sugar Planters' Association. **JANUARY**

TO

DECEMBER

H. L. LYON, Director

ENTOMOLOGY

C. E. PEMBERTON, Executive Entomologist

R. C. L. PERKINS, Consulting Entomologist

O. H. SWEZEY, Consulting Entomologist

F. X. WILLIAMS, Associate Entomologist

R. H. VAN ZWALUWENBURG, Associate Entomologist

F. A. BIANCHI, Assistant Entomologist J. S. ROSA, Laboratory Technician

PATHOLOGY

J. P. MARTIN, Pathologist C. W. CARPENTER, Associate Pathologist

D. M. WELLER, Histologist

GENETICS

A. J. MANGELSDORF, Geneticist C. G. LENNOX, Associate Geneticist

WILLIAM BRANDT, Field Assistant A. Dor. Field Assistant

R. URATA, Field Assistant

AGRICULTURE

R. J. BORDEN, Agriculturist

J. A. VERRET, Consulting Agriculturist

R. E. DOTY, Associate Agriculturist L. R. SMITH, Associate Agriculturist

H. A. WADSWORTH, Irrigation Specialist

J. A. SWEZEY, Assistant-in-Irrigation A. Y. CHING, Assistant in Cane Growth Studies

CHEMISTRY

F. E. HANCE, Chemist

F. R. VAN BROCKLIN, Associate Chemist

A. S. AYRES, Assistant Chemist

PAUL Gow, Assistant Chemist

Q. H. YUEN, Assistant Chemist

E. K. HAMAMURA, Assistant Chemist

T. NISHIMURA, Assistant Chemist

L. L. SUTHERLAND, Clerk, Fertilizer Control

TECHNOLOGY

W. L. MCCLEERY, Technologist RAYMOND ELLIOTT, Assistant Technologist H. A. COOK, Assistant Technologist FRED HANSSON, Assistant Technologist MORGAN KILBY, Assistant Technologist

BOTANY AND FORESTRY

H. L. LYON, Botanist and Forester E. L. CAUM, Associate Botanist L. W. BRYAN, Associate Forester (Hawaii) G. A. McEldowney, Associate Forester (Oahu) A. W. DUVEL, Associate Forester (Kauai)

TABLE OF CONTENTS

I	Page
Field Movement of Sugar Cane Beetle Borer Adults	3
Some Effects Produced on Sugar Cane by Minor Elements	7
Border Effect in Field Experiments That Are Concerned	
with Fertilizer Practices	11
Proper Proportioning and Timing of Nitrogen Applica-	
tions	15
A Chytrid in Relation to Chlorotic Streak Disease of Sugar	
Cane	19
The Role of the Spectrograph in the Analysis of Agricul-	
tural Materials	35
Irrigation Interval Control as an Aid in Lowering Pro-	
duction Costs	49
Sugar Prices	69
Notes on the Life History of Baeus californicus Pierce, an	
Egg Parasite of the Black Widow Spider	73
Forms of Nitrogen for Sugar Cane	81
The Synthesis of Sucrose by Excised Blades of Sugar Cane	89
Factors Affecting the Germination of Sugar Cane	117
Sugar Prices	147
A Survey of the Insect Pests of Cultivated Plants in Guam	151
A Spectrographic Study of the Distribution of the Mineral	
Elements in Sugar Cane	183
Some Effects of Cane Quality Produced by Different Soils	187
Integration of Climatic and Physiologic Factors with Ref-	
erence to the Production of Sugar Cane	201
Sugar Prices	234
Nitrogen-Potash-Sunlight Relationships	237
A Devastating Weed	243
Colchicine in Relation to Sugar Cane Breeding	251
The Factor of Synergism in Chemical Weed Control	263
Further Studies in Nitrogen Nutrition	273
Sugar Prices

ILLUSTRATIONS APPEARING ON THE COVERS OF VOLUME XLIV

FIRST QUARTER

Seed pieces cut from 13-month 31-1389 cane, that had been fertilized with nitrogen 2 weeks previously, produced a faster and a superior growth (at right) to those from unfertilized but otherwise comparable seed (at left).

SECOND QUARTER

Black Widow spider parasite recently introduced into Hawaii from California and distributed throughout the Territory (greatly enlarged).

THIRD QUARTER

The Midway quarantine service, operated by the H.S.P.A., is protecting Hawaiian agriculture against these Guam insect pests which could easily reach here alive in trans-Pacific airplanes.

The weed pest, Mikania micrantha, covering the ground and climbing into a large law pata tree in the lower forest zone behind Safune, Savaii, at an elevation of about 1,700 feet. (Photograph by E. H. Bryan, Jr., courtesy Bernice P. Bishop Museum.)
